Significance: Jantar Mantar is a collection of 19 architectural astronomical instruments, built by the Rajput king Sawai Jai Singh II between 1727 and 1734.

History: Jantar Mantar was constructed as part of a larger astronomical observatory built by Jai Singh II. The instruments were used to measure the time, track the stars, and predict eclipses.

Architecture: The instruments are made of stone and marble, and are designed to be accurate to within one second of time.
